Solving a system of linear equations means that you will be solving two or more equations with two or more unknowns simultaneously. In order to solve distance, rate, and time problems using systems of linear equations, it is necessary to . know how to solve a linear equation in terms of one variable: one-step lesson, two-step lesson, multi-step lesson

**Word Lesson: Distance II (Systems of Equations)**

This collection of printable math worksheets is a great resource for practicing how to solve word problems, both in the classroom and at home. There are different sets of addition word problems, subtraction word problems, multiplication word problems and division word problems, as well as worksheets with a mix of operations.

**Word Problems - Dads Worksheets**

As is frequently the case with word problems, setting up the equations is the hardest part. Once that's done, the rest is relatively easy. Remember always to answer what the question asks - don't stop once you've solve for x, because that may be only part of what the question asked - and always check your answer.
