Classical physics refers to theories of physics that predate modern, more complete, or more widely applicable theories. If a currently accepted theory is considered to be modern, and its introduction represented a major paradigm shift, then the previous theories, or new theories based on the older paradigm, will often be referred to as belonging to the realm of "classical physics".

The answer, I think, is the one I put forward in my talk when I anticipated it would get me into trouble. Proposing that some gender imbalances in fields like physics might not be due to discrimination is like being a social scientist in the Soviet Union and proposing that some class differences aren't due to discrimination.
