Distributed computing is a field of computer science that studies distributed systems. A distributed system is a system whose components are located on different networked computers, which communicate and coordinate their actions by passing messages to one another. The components interact with one another in order to achieve a common goal. Three significant characteristics of distributed ...

File systems allocate space in a granular manner, usually multiple physical units on the device. The file system is responsible for organizing files and directories, and keeping track of which areas of the media belong to which file and which are not being used. For example, in Apple DOS of the early 1980s, 256-byte sectors on 140 kilobyte floppy disk used a track/sector map.

Basic Linux kernel documentation The following are Linux kernel related documents, which you should take a look at before you post to the linux-kernel mailing list: . The Linux Kernel Hackers' Guide, compiled by Michael K. Johnson of Red Hat fame. Includes among other documents selected Q/As from the linux-kernel mailing list.

The linux-kernel mailing list FAQ

Today I was eating at the Subway by Airborne School. A Major from [unit redacted] walked by and asked where I was headed. I told him Fort Irwin and he laughed right in my face saying "Wow you must've been last in your class. No tab and headed to Irwin." The above excerpt is from an email by a young Infantry officer I had the chance to mentor over the past few months.

Admittedly a prosaic concept, research impact can be roughly divided into academic and non-academic dimensions. Academic research impact is often (over)simplified to mere citations—an impactful article is well cited and utilized by others, with citation counts being offered by Google Scholar, Scopus, or ISI Web of Science.
