Quality management ensures that an organization, product or service is consistent. It has four main components: quality planning, quality assurance, quality control and quality improvement. Quality management is focused not only on product and service quality, but also on the means to achieve it. Quality management, therefore, uses quality assurance and control of processes as well as products ...

Managed services is the practice of outsourcing on a proactive basis certain processes and functions intended to improve operations and cut expenses. It is an alternative to the break/fix or on-demand outsourcing model where the service provider performs on-demand services and bills the customer only for the work done.. Under this subscription model, the client or customer is the entity that ...
