Light sheet fluorescence microscopy (LSFM) is a fluorescence microscopy technique with an

intermediate-to-high optical resolution, but good optical sectioning capabilities and high speed. In contrast to epifluorescence microscopy only a thin slice (usually a few hundred nanometers to a few micrometers) of the sample is illuminated perpendicularly to the direction of observation.

Tissue Membranes. A tissue membrane is a thin layer or sheet of cells that covers the outside of the body (for example, skin), the organs (for example, pericardium), internal passageways that lead to the exterior of the body (for example, abdominal mesenteries), and the lining of the moveable joint cavities. There are two basic types of tissue membranes: connective tissue and epithelial ...

4.1 Types of Tissues - Anatomy and Physiology

Throughout this chapter, we will express embryonic and fetal ages in terms of weeks from fertilization, commonly called conception. The period of time required for full development of a fetus in utero is referred to as gestation (gestare = "to carry" or "to bear"). It can be subdivided into distinct gestational periods.

Australopithecus afarensis (Latin: "Southern ape from Afar") is an extinct hominin that lived between 3.9 and 2.9 million years ago in Africa. A. afarensis was slenderly built, like the younger Australopithecus africanus. A. afarensis is thought to be more closely related to the genus Homo (which includes the modern human species Homo sapiens), whether as a direct ancestor or a close relative ...

Many people have discovered the convenience and cost-effectiveness of Walmart Vision Center for their eye and vision care needs. Considering that Walmart now offers services for photography, automotive needs, nails, banking, and beauty needs, it's no surprise that the mega-giant retailer offers eyeglasses and contact lenses, along with eye exams by licensed doctors of optometry.

Review of Walmart Vision Center for Eye Exams and Glasses

Blood is the "river of life" that surges within us. It transports everything that must be carried from one place to another within the body- nutrients, wastes (headed for elimination from the body) and body heat through blood vessels. Long before modern medicine, blood was viewed as magical, because when it drained from the body, life departed as well.
