Genitourinary and Reproductive System Function and ...

The urethra is an organ of both the male reproductive system and a gland of the genitourinary or urinary system. The urethra connects the bladder to the external environment for urination and it also moves semen externally through and outside of the penis with orgasm. The Hormones of the Male Reproductive System

Reproductive System: TEAS || RegisteredNursing.org

The genitourinary system consists of two kidneys, two ureters, one urinary bladder, and one urethra. The genitourinary system also includes the reproductive organs: the prostate gland, testicles, and epididymis in men, and the uterus, fallopian tubes, ovaries, vagina, external genitalia, and perineum in women.

Genitourinary System - an overview | ScienceDirect Topics

The genitourinary system or urogenital system is the organ system of the reproductive organs and the urinary system. These are grouped together because of their proximity to each other, their common embryological origin and the use of common pathways, like the male urethra.

Genitourinary system - Wikipedia

The main function of the urinary system is to regulate fluid and electrolyte balance. The purpose of genitalia is to provide a route for excretion and for reproduction. Because of the function of these body systems, some people may have difficulty discussing problems they are experiencing.

Physical Assessment- Chapter 6 Genitourinary System ...

How both male and female hormones work in the body (reproductive system) How the kidneys filter blood (genitourinary system) How the body communicates via electronic signals (neuromuscular system) For these concepts, you'll likely need to dive deep into studying.
