Of main interests to us is the use of mining as a part of in-situ resource utilization, that is: making it easier to industrialize and colonize space by removing the need to pay the sky-high delta-V cost of lugging raw materials up Terra's gravity well.. But in the early stages, asteroid mining start-ups cannot be established to provide minerals to space industrialization because there won't ...

This post was triggered by someone reaching here with the search "What is inside peach seeds that's poison". I almost decided to laugh about it like on all other silly search phrases leading here, but then figured I should at least check if maybe it's not silly.. And it turns out that peach seeds actually contain Cyanide, in the form of Amygdalin.
