Heredity - Chromosomal aberrations: The chromosome set of a species remains relatively stable over long periods of time. However, within populations there can be found abnormalities involving the structure or number of chromosomes. These alterations arise spontaneously from errors in the normal processes of the cell. Their consequences are usually deleterious, giving rise to individuals who ...

The story of Haeckel's embryos is different in an important way from that of the other chapters in Jonathan Wells' book. As the other authors show, Wells has distorted ideas that are fundamentally true in order to make his point: all his rhetoric to the contrary, Archaeopteryx is a transitional fossil, peppered moths and Darwin's finches do tell us significant things about evolution, four-winged ...
