Structured Computer Organization 6th Edition

A data model (or datamodel) is an abstract model that organizes elements of data and standardizes how they relate to one another and to properties of the real world entities. For instance, a data model may specify that the data element representing a car be composed of a number of other elements which, in turn, represent the color and size of the car and define its owner.

Data model - Wikipedia

A database is an organized collection of data, generally stored and accessed electronically from a computer system. Where databases are more complex they are often developed using formal design and modeling techniques.. The database management system (DBMS) is the software that interacts with end users, applications, and the database itself to capture and analyze the data.

Database - Wikipedia

APA stands for the American Psychological Association. You'll most likely use APA format if your paper is on a scientific topic. Many behavioral and social sciences use this organization's standards and guidelines.
