Origins What is the purpose of the project? At the time of Go's inception, only a decade ago, the programming world was different from today. Production software was usually written in C++ or Java, GitHub did not exist, most computers were not yet multiprocessors, and other than Visual Studio and Eclipse there were few IDEs or other high-level tools available at all, let alone for free on the ...

Frequently Asked Questions (FAQ) - The Go Programming Language

IMHO, the best way to implement singletons is with a "double-check, single-lock" pattern, which you can implement portably in C++ 11: Double-Checked Locking Is Fixed In C++11 This pattern is fast in the already-created case, requiring only a single pointer comparison, and safe in the first-use case. As mentioned in previous answer, C++ 11 guarantees construction-order safety for static local ...

How to implement multithread safe singleton in C++11 ...

Eiffel is an object-oriented programming language designed by Bertrand Meyer (an object-orientation proponent and author of Object-Oriented Software Construction) and Eiffel Software. Meyer conceived the language in 1985 with the goal of increasing the reliability of commercial software development; the first version becoming available in 1986. In 2005, Eiffel became an ISO-standardized language.

Eiffel (programming language) - Wikipedia

At this point, we want to highlight the relationships among the meta-characteristics we have previously identified, and the dimensions in our taxonomy (see Table 1). More specifically, the dimensions related to the first, second, fourth and fifth questions, are derived from the first group of aspects identified in the meta-characteristic, while the dimension concerning the third question is a ...
