In economics and other social sciences, preference is the ordering of alternatives based on their relative utility, a process which results in an optimal "choice" (whether real or theoretical).The character of the individual preferences is determined purely by taste factors, independent of

considerations of prices, income, or availability of goods.

A single-displacement reaction, also known as a single-replacement reaction, is a reaction by which one (or more) element(s) replaces an/other element(s) in a compound. It can be represented generically as:  $A + B-C \rightarrow A-C + B$ . This will most often occur if A is more reactive than B, thus giving a more stable product.. A and B must be either: Different metals (hydrogen's behavior as a cation ...

Reactions in chemistry fall into many different categories. The "double replacement reaction" is a very common type that takes place when two pairs of charged particles essentially "change partners." Silver nitrate and sodium chloride readily undergo double displacement in water, producing silver chloride and sodium nitrate salt.

### The Double Replacement Reaction of Silver Nitrate & Sodium ...

Le lactate de sodium est un sel de sodium et d'acide lactique. Il est produit par fermentation d'une source de sucres telle que le maïs puis la neutralisation du lactate de sodium conduit à la formation du composé de formule brute  $\text{NaC}_3\text{H}_5\text{O}_3$  [4].. Dès 1836, le lactate de sodium était plutôt considéré comme étant un sel d'acide faible plutôt qu'une base.
