Chemistry: Lab – Ions in Aqueous Solution Introduction: Many ionic solids dissolve in water to form clear, aqueous solutions that conduct electricity. It is the ions that conduct the electric current. These solutions contain both positive ions (cations) and negative ions (anions) in such a ratio that the net electric charge of the solution is zero.

Reactions in aqueous solution

Precipitation reactions occur when cations and anions in aqueous solution combine to form an insoluble ionic solid called a precipitate. Whether or not such a reaction occurs can be determined by using the solubility rules for common ionic solids. Because not all aqueous reactions form precipitates, one must consult the solubility rules before determining the state of the products and writing a ...
