What is drug addiction? Addiction is defined as a chronic, relapsing disorder characterized by compulsive drug seeking and use despite adverse consequences.† It is considered a brain disorder, because it involves functional changes to brain circuits involved in reward, stress, and self-control, and those changes may last a long time after a person has stopped taking drugs.¹¹

Drug abuse and addiction, now both grouped as substance or drug use disorder, is a condition characterized by a self-destructive pattern of using a substance that leads to significant problems and distress, which may include tolerance to or withdrawal from the substance.

Drug Abuse and Addiction - MedicineNet

We need new metrics for measuring the success of our nation's drug policies. Rather than measuring success based on slight fluctuations in drug use, the primary measure of effectiveness should be the reduction of drug-related harm - such as overdose deaths, drug addiction, and the transmission of diseases such as HIV/AIDS and hepatitis C. Critically, though, our drug policies should also be ...
