Improved friction performance is an important objective of equipment manufacturers for meeting improved energy efficiency demands. The addition of friction-reducing additives, or friction modifiers (FMs), to lubricants is a key part of the strategy. The performance of these additives is related to their surface activity and their ability to form adsorbed layers on the metal surface.

Equilibrium chemistry is concerned with systems in chemical equilibrium. The unifying principle is that the free energy of a system at equilibrium is the minimum possible, so that the slope of the free energy with respect to the reaction coordinate is zero. This principle, applied to mixtures at equilibrium provides a definition of an equilibrium constant.

Social constructionism is a general term sometimes applied to theories that emphasize the socially created nature of social life. Of course, in one sense all sociologists would argue this, so the term can easily become devoid of meaning. More specifically, however, the emphasis on social constructionism is usually traced back at least to the work of William Isaac Thomas and the Chicago ...
