Software Escrow Solutions

Impact/SQL. Impact/SQL is a fully integrated title and escrow system, based on an MS SQL® back-end. The product is divided into several modules, grouping functionality into the primary departmental structure of most companies in the industry: Escrow, Title, Escrow Accounting and Management Information. Generally, most employees will only utilize one of the modules, depending on their ...

USA Digital Solutions - Title & Escrow Software

A software escrow is a service that helps protect all parties involved in a software license by having a neutral 3rd party escrow agent hold source code, data, and documentation until a mutually-agreed-upon event occurs.

What is a Software Escrow and Source Code Escrow? | EscrowTech

Although roughly 80% of the intellectual property in escrow is for software, there are many contracts that protect assets like: design documentation, formulas, algorithms, recipes, non-source code based technology, and other proprietary materials that are managed by us until the conditions in their contracts are met and we are to deliver the materials to the appropriate party.

Software as a service (SaaS / s æ s /) is a software licensing and delivery model in which software is licensed on a subscription basis and is centrally hosted. It is sometimes referred to as "on-demand software", and was formerly referred to as "software plus services" by Microsoft. SaaS is typically accessed by users using a thin client, e.g. via a web browser.
