Alpha Theory corrects any breakdowns in the decision process of a money manager by identifying the optimal economic decision based on a firm's fundamental research including risk-adjusted return. By fixing these breakdowns a firm can ensure that their best ideas are always their largest positions and that each position generates the maximum amount of alpha for the portfolio.

The theory of constraints (TOC) is a management paradigm that views any manageable system as being limited in achieving more of its goals by a very small number of constraints. There is always at least one constraint, and TOC uses a focusing process to identify the constraint and restructure the rest of the organization around it. TOC adopts the common idiom "a chain is no stronger than its ...
