The question-answer relationship (QAR) strategy helps students understand the different types of questions. By learning that the answers to some questions are "Right There" in the text, that some answers require a reader to "Think and Search," and that some answers can only be answered "On My Own," students recognize that they must first consider the question before developing

Question-Answer Relationship (QAR) - Reading Rockets

2.37.3 Background and Context . Groups and questions that make up a Questionnaire can use the definition element to refer to data elements in external code systems and StructureDefinitions. In this way, it's possible to leverage standard definitions of questions and their associated data types and answer sets across questionnaires.
