Welcome to Down South Solar Power

Solar Power. Solar power is produced by collecting sunlight and converting it into electricity. This is done by using solar panels, which are large flat panels made up of many individual solar cells.

Solar Power - Alternative Energy

The second main component of a solar power system installation is the inverter, which can be either a string inverter (around the size of a briefcase) or microinverters, which are approximately the size of a paperback book.. A string inverter is installed on a wall and all the solar panels connect to it.

12 thoughts on “ How Many 80 Watt Solar Panels to Run a House ? Jon March 10, 2011 at 3:15 pm. The above math assumes only 1 hour of sunlight per month. I more reasonable scenario would be as follows. 600000 watts divided by 80 equals 7500 divided by 30 days equals 250. divide that by 4,5 hours of daylight per day and you get 56 panels.

How Many 80 Watt Solar Panels to Run a House ...

Using parts easily available from the internet (see helpful links) and your local stores, you can make a small solar power generator for \$250 to \$300. Great for rolling blackouts, life outside the power grid, or the coming zombie apocalypse. Power your computer, modem, dvd, tv, cameras, lights, fans, or DC appliances anywhere you go.

"How to make a solar power generator" - RAIN Network

The Homestead. Gary W. had no power lines near by. The electric company told him it would cost \$10,000 a pole. He chose to purchase our medium sized system, The Homestead, one the most popular we sell. For an investment of under \$20 Grand, he now lives where he wants, he is not tethered to the power company, and he does not have to worry about black outs or disconnection notices for late payments.
