The answer to question 7 must be wrong, because it is greater than 1. The English grammar through these questions also has many mistakes, e.g. "are common" should be "are in common"

40 Questions on Probability for data science - [Solution ...

Best Answer: Each dice can be considered an independent event, and each dice has a 0.5 chance of rolling even. The chance that either dice 1 or dice 2 show an even number is given by one minus the chance that they both roll an odd number: $1 - 0.5^2 = 0.75$. If you want the probability that EXACTLY one of the ...
