James "Jim" Wells focuses on understanding and modulating signaling processes in human cells through protein and small molecule design. His lab seeks activators as well as inhibitors of signaling molecules, including proteases and kinases, and uses them to study the consequences of triggering specific nodes of signaling circuits.

Unethical human experimentation in the United States describes numerous experiments performed on human test subjects in the United States that have been considered unethical, and were often performed illegally, without the knowledge, consent, or informed consent of the test subjects. Such tests have occurred throughout American history, but particularly in the 20th century.
