1. Remind students of the previous day's lesson introducing the three steps of protein synthesis listed on the board: transcription, RNA processing, translation. Tell them that today they will be participating in a lab simulation so that they can get further into the details of protein synthesis. 2. Pass out the lab activity document. Ask students to read the directions to themselves.

Ninth grade Lesson Simulating Protein Synthesis (Day 1 of 2)

The process by which the information from DNA is transferred into the language of proteins is known as translation. Transcription and translation together comprise the process called protein synthesis or . gene expression. The actual different gene sequences for the traits are the different forms of the gene or . alleles
