No, and this has been brought up by philosophers since the early days of philosophy. You can ask logical questions that simply cannot be answered after the question has brought up the dilemma. There is the philosopher from Crete who says that all ...

### **Does every problem have a solution? - Quora**

For these problems, it is very easy to tell whether solutions exist, but thought to be very hard to tell how many. Many of these problems are  $\#P$ -complete, and hence among the hardest problems in  $\#P$ , since a polynomial time solution to any of them would allow a polynomial time solution to all other  $\#P$  problems.

### **P versus NP problem - Wikipedia**

Some problems may belong to more than one discipline of mathematics and be studied using techniques from different areas. Prizes are often awarded for the solution to a long-standing problem, and lists of unsolved problems (such as the list of Millennium Prize Problems) receive considerable attention.

### **List of unsolved problems in mathematics - Wikipedia**

The problem has a solution, the solution belongs to the problem. I will find a solution to the problem for my boss, because that's what he pays me to do. I will agree with both RGB and JasperLoy that if I heard "a solution for the problem" I wouldn't think it was necessarily incorrect, it just doesn't sound as good to me.
