Koch Snowflake. The Koch snowflake is a fractal curve, also known as the Koch island, which was first described by Helge von Koch in 1904. It is built by starting with an equilateral triangle, removing the inner third of each side, building another equilateral triangle at the location where the side was removed, and then repeating the process indefinitely.

### **Koch Snowflake -- from Wolfram MathWorld**

Are all stars suns? The answer depends on your definition of “sun.” Some feel that our sun is the only sun. Astronomer and writer, Rod Martin, Jr. has asked us to consider “sun” to mean any star which has a family of planets. Our sun already has its own unique name—Sol.
