Appraisal theory is the theory in psychology that emotions are extracted from our evaluations (appraisals or estimates) of events that cause specific reactions in different people. Essentially, our appraisal of a situation causes an emotional, or affective, response that is going to be based on that appraisal. An example of this is going on a first date.

Self-concept tends to be more malleable when people are younger and still going through the process of self-discovery and identity formation. As people age, self-perceptions become much more detailed and organized as people form a better idea of who they are and what is important to them.

What Is Self-Concept and How Does It Form? - Verywell Mind

This answers the question "Development for what purpose?" To get better at the current job? This is the time to have a career discussion with the employee, to find out what they aspire to - some other job, either a promotion or lateral move, or if are they satisfied with where they are currently.

Individual Development Plan Examples

People are not born completely self-aware. Yet research has also found that infants do have a rudimentary sense of self-awareness. Infants possess the awareness that they are a separate being from others, which is evidenced by behaviors such as the rooting reflex in which an infant searches for a nipple when something brushes against his or her face.
