Telling that PulseAudio won't be very useful. It can already detect hotplugged devices just fine on its own; however, due to --disallow-module-loading it is no longer able to use the devices, since it's forbidden from loading module-alsa-card after a device is detected. (Arguably module-udev-detect should be exempt from this restriction...)

A "general statement" "intended to develop a unified conceptual scheme for theory and research in the social sciences" was published by nine USA social scientists in 1951. Theory was to be based on a "theory of action" in which "the point of reference of all terms is the action of an individual actor or collective of actors".
