A mind map is a diagram used to visually organize information. A mind map is hierarchical and shows relationships among pieces of the whole. It is often created around a single concept, drawn as an image in the center of a blank page, to which associated representations of ideas such as images, words and parts of words are added.

Note-taking is one of those skills that rarely gets taught. Teachers and professors assume either that taking good notes comes naturally or that someone else must have already taught students how to take notes. Then we sit around and complain that our students don't know how to take notes. I figure it's about time to

Another way to look at hexagonal grids is to see that there are three primary axes, unlike the two we have for square grids. There's an elegant symmetry with these. Let's take a cube grid and slice out a diagonal plane at  $x + y + z = 0$ . This is a weird idea but it helps us make hex grid algorithms simpler. In particular, we can reuse standard operations from cartesian coordinates: adding ...
