A spreadsheet is an interactive computer application for organization, analysis and storage of data in tabular form. Spreadsheets developed as computerized analogs of paper accounting worksheets. The program operates on data entered in cells of a table. Each cell may contain either numeric or text data, or the results of formulas that automatically calculate and display a value based on the ...

While everyone agrees that color coding is very important, keeping up with it can be a pain in native Excel. It's not easy to format cells based on whether they are inputs or formulas, but it can be done. One option is to use Excel's "Go To Special" (covered in our Excel Crash Course, which you can enroll in here). Alternatively, color coding is dramatically simplified with a third party Excel ...
