A machine (or mechanical device) is a mechanical structure that uses power to apply forces and control movement to perform an intended action. Machines can be driven by animals and people, by natural forces such as wind and water, and by chemical, thermal, or electrical power, and include a system of mechanisms that shape the actuator input to achieve a specific application of output forces ...

Oracle VM VirtualBox provides Guest Addition modules for Windows, Linux, and Oracle Solaris to enable automated logins on the guest. When a guest operating system is running in a virtual machine, it might be desirable to perform coordinated and automated logins using credentials from a master login system.

By default, each virtual machine has one directory on your host computer where all the files of that machine are stored: the XML settings file, with a .vbox file extension, and its disk images.. By default, this machine folder is placed in a common folder called VirtualBox VMs, which Oracle VM VirtualBox creates in the current system user's home directory.

Flux-Cored The flux-cored process is only recommended on materials as thin as 20 gauge, a bit thicker than the 24 gauge we said for MIG. In general, this process is best for welding thicker materials with a single pass, especially if you need to weld outdoors such as to repair a tractor out in the field.
