In order to develop Subsurface to serve its users in the best possible way, it's important to have user information. Upon launching Subsurface and using the software for a week or so, a one-box user survey pops up. It is entirely optional and the user controls what, if any, data are sent to the Subsurface development team. All data the user sends is useful, and will only be used to steer ...

### **Selling your project proposal - PMI**

This paper discusses the ways in which automation of industrial processes may expand rather than eliminate problems with the human operator. Some comments will be made on methods of alleviating these problems within the 'classic' approach of leaving the operator with responsibility for abnormal conditions, and on the potential for continued use of the human operator for on-line decision ...
