In monetary economics, the quantity theory of money (QTM) states that the general price level of goods and services is directly proportional to the amount of money in circulation, or money supply.. The theory was challenged by Keynesian economics, but updated and reinvigorated by the monetarist school of economics.While mainstream economists agree that the quantity theory holds true in the ...

For added complication and a point of further discussion, the DFARS statement at 227.7100(b) appears to be inconsistent with the Statute. This DFARS statement would appear to place "technical data" which is "computer software documentation" under DFARS Subpart 227.72 in lieu of 227.71. There are several potential problems with doing this.
