When and How Are Standards-Based Units Designed? Because standards-based units require considerable planning and organization, they are best developed when teachers have a block of time available for design—during the summer, for example, or a combination of vacation time, release time during the school year, and after-school meetings.

Standards-Based Curriculum and Assessment Design

Students practise reading skills, including recognising style and point of view, and complete follow on activities for speaking and writing.

An important use of technology is its capacity to create new opportunities for curriculum and instruction by bringing real-world problems into the classroom for students to explore and solve; see Box 9.1. Technology can help to create an active environment in which students not only solve problems, but also find their own problems.
