Water Line Repair. ARS Cleveland also specializes in servicing your water lines. Water lines are a vital part of your plumbing system. Because of their importance, ensuring these lines are clean and functioning is crucial, as they can be damaged by various outside factors over time.

Sewer Line Repair and Replacement - ARS Cleveland

Sanitary sewer backups usually occur in the lowest open drain. A sewage backup is typically caused by a blockage somewhere in the line. If you experience a backup every time you flush or run water down your sink or bathtub drain, then the problem is likely in your main sewer line since all drains rely on the main sewer line to drain properly.

10 Symptoms of a Damaged Sewer Pipe | PipeLT

"Any plumbing from the '60s or older is on its last legs," says Howard Maxfield, a long-time home inspector in the greater Seattle area. That's because most of the piping used pre-1960s was galvanized steel, the bane of old-house plumbing.

Top 2 Reasons to Replace Old Plumbing | Old House Web

All pipes experience wear and tear over time. By now, laterals and sewer pipes in older homes made from clay tiles would be long overdue for a replacement, and contractors digging up your lawn and garden isn't a pretty sight.

How to Fix a Sewer Gas Smell Studor Mini Vent. The Studor Vent is a one-way air admittance valve that allows air to flow into the drain pipe but not out into the room. Running water going down the drain pipe creates a vacuum that could siphon the U-trap dry. The purpose of the U-trap (also called a P-trap or J-trap) is to create a water seal to prevent sewer gasses from coming back up the sink ...

Drain Fly Infestation . These lovely little drain mites feed on waste matter in the sewer system and when you have a system prone to blocking or even the odd partial blockage solids and waste matter will build up in a redundant branch line, the flies start to feed and breed and if they find a way out and into your sub-floor or cavity they will infest the area very quickly.

capping redundant drains using drain patch liners

Some of the common sink plumbing problems homeowners can have are easily remedied or can be avoided if precautionary methods are taken. The part of your sink that water flows out of and turns the water on and off is part of the faucet assembly. Water flows through the flange or strainer basket and with gravity's help eventually moves through the pipes under the sink and out to the sewer lines.
