You push on the side of a toy truck rolling along the floor. What will happen to the motion of the truck? 4. What term refers to the sum of all of the forces acting on an object? 5.

Study Guide and Reinforcement - Student Edition

Hearing around corners You can hear sounds around a corner due to the diffraction that takes place with the sound waves. Sound waves are about 1 to 2 feet across; a door is about 3 feet. This allows some of the sound waves to diffract through a doorway. Light will not diffract around a corner due to the short wavelength of light.
