From its historical monitoring data EnAppSys has found that on and offshore wind generation has risen by 57% since the first quarter of 2015. In the first quarter of 2019 the 104.7TWh produced from hydro was down 25% from the previous year and 7% from the levels in the first quarter of 2015, with relatively limited capacity being built out across Europe, according to the analyst.

EU wind blows past hydro - reNews - Renewable Energy News

UK wave developer Marine Power Systems has taken the wraps off two floating wind concepts designed to be installed in deep water locations. Research and development of its megawatt-scale WaveSub device has led the Swansea outfit to progress two derivative devices, the DualSub (pictured) that captures both wave and wind energy and WindSub that captures only wind energy.
