Bicycle and motorcycle dynamics is the science of the motion of bicycles and motorcycles and their components, due to the forces acting on them. Dynamics falls under a branch of physics known as classical mechanics. Bike motions of interest include balancing, steering, braking, accelerating, suspension activation, and vibration. The study of these motions began in the late 19th century and ...

It is interesting to note that it is 21 months since anyone contributed to this blog. So domestic CHP might be dying if not actually dead. I have engineered some commercial industrial CHP's and the only clients who make savings are the one who need both the by products, ie lots of heating medium and generated electricity. The electricity can be exported under normal conditions or be used as an ...
