An elevator (US and Canada) or lift (Commonwealth countries) is a type of vertical transportation device that moves people or goods between floors (levels, decks) of a building, vessel, or other structure. Elevators are typically powered by electric motors that drive traction cables and counterweight systems like a hoist, although some pump hydraulic fluid to raise a cylindrical piston like a jack.

### **Elevator - Wikipedia**

Background. Confirmation of match between patient and blood product remains a manual process in most operating rooms (ORs), and documentation of dual-signature verification remains paper based in most medical institutions.
