Mollusks and Annelids KEY - The Biology Corner

The largest eyes of all: The majority of squid are no more than 60 cm in length, but the giant squid is reportedly up to 20 m in length, which made it the largest invertebrate in the world, and it has the largest eyes of all. Recently, however, an even larger specimen of a poorly understood species, the Colossal Squid, has been discovered.

WebQuest: Squid - Zunal.Com

Squid are an important part of the ocean food web; they are a major food source for many fish, birds and marine mammals. Squid are gaining popularity as a food source for humans around the world (calamari). However, over-fishing is a growing concern because there are no regulations on squid harvesting.
