Weightlessness is the complete or near-complete absence of the sensation of weight. This is also termed zero-g, although the more correct term is "zero g-force". It occurs in the absence of any contact forces upon objects including the human body.. Weight is a measurement of the force on an object at rest in a relatively strong gravitational field (such as on the surface of the Earth).

Weightlessness - Wikipedia

This course prepares students for success in their academic and professional careers. The foundations of professional success are established through the introduction and use of MS Office resources, Bellevue University Library resources and self-assessments.
