In mathematics, general topology is the branch of topology that deals with the basic set-theoretic definitions and constructions used in topology. It is the foundation of most other branches of topology, including differential topology, geometric topology, and algebraic topology. Another name for general topology is point-set topology.. The fundamental concepts in point-set topology are ...

The topology of an electronic circuit is the form taken by the network of interconnections of the circuit components. Different specific values or ratings of the components are regarded as being the same topology. Topology is not concerned with the physical layout of components in a circuit, nor with their positions on a circuit diagram.

One of the most important steps in working out how you want to collect and manage your sustainability data is understanding what data there is and where it comes from – in essence, building a three dimensional topology of the data that is available within your organisation.. Before you run out of the door and ask for everyone's input, keep reading!

In their 1978 book *Organization Strategy, Structure, and Process*, Raymond E. Miles and Charles C. Snow argued that different company strategies arise from the way companies decide to address three fundamental problems: entrepreneurial, engineering (or operational), and administrative problems. The entrepreneurial problem is how a company should manage its market share.

Found a second defaults directive file . This is caused by the [defaults] directive appearing more than once in the topology or force field files for the system - it can only appear once. A typical cause of this is a second defaults being set in an included topology file, .itp, that has been sourced from somewhere else. For specifications on how the topology files work, see GROMACS Manual ...

If  $x_0$  is an ordinary point of the ordinary differential equation, expand  $y$  in a Taylor series about

$x_0$ . Commonly, the expansion point can be taken as  $x_0=0$ , resulting in the Maclaurin series  $y=\sum_{n=0}^{\infty} a_n x^n$ . (1) Plug  $y$  back into the ODE and group the coefficients by power. Now, obtain a recurrence relation for the  $n$ th term, and write the series expansion in terms of the  $a_n$ s.
