News Release. Wednesday, August 8, 2018. Induced labor at 39 weeks may reduce likelihood of C-section, NIH study suggests. Elective induction at 39 weeks also linked to lower risk of maternal high blood pressure disorders.

Induced labor at 39 weeks may reduce likelihood of C ...

Caesarean section, also known as C-section, or caesarean delivery, is the use of surgery to deliver babies. A caesarean section is often necessary when a vaginal delivery would put the baby or mother at risk. This may include obstructed labor, twin pregnancy, high blood pressure in the mother, breech birth, or problems with the placenta or umbilical cord.

Caesarean section - Wikipedia

Reproduction (or procreation or breeding) is the biological process by which new individual organisms – "offspring" – are produced from their "parents". Reproduction is a fundamental feature of all known life; each individual organism exists as the result of reproduction. There are two forms of reproduction: asexual and sexual. In asexual reproduction, an organism can reproduce without the ...

Reproduction - Wikipedia

Unique for its role in human reproduction, a gamete is a specialized sex cell carrying 23 chromosomes—one half the number in body cells. At fertilization, the chromosomes in one male gamete, called a sperm (or spermatozoon), combine with the chromosomes in one female gamete, called an oocyte. The function of the male reproductive system is to produce sperm and transfer them to the female ...

This review has highlighted the variability of empirical evidence regarding Muslim patients' sexual and reproductive health-care matters. This variability can partly be explained by that Islamic edicts are under constant reconstructions and renegotiations, both by Islamic authorities and by individual Muslims.
