Living Environment Topic 8 Scientific Inquiry and Skills ...

Science process skills refer to six scientific actions: observation, communication, classification, measurement, inference and prediction. It is also essential for a scientist to be able to distinguish his objective observations from his inferences and predictions. This is because scientific inquiry and study depend on objectivity and an avoidance of hasty assumptions in experimentation.

Mrs. LaVallee - REGENTS LIVING ENVIRONMENT

Introduction. Scientific inquiry was first introduced as a method of thinking that was equally important to science content, but often interpreted as a set of steps and procedures, such as the “scientific method.” Later, scientific inquiry became understood as a hands-on and minds-on approach requiring more than a set of steps,...
