Social psychology is the scientific study of how people's thoughts, feelings and behaviors are influenced by the actual, imagined or implied presence of others. In this definition, scientific refers to the empirical investigation using the scientific method. The terms thoughts, feelings and behavior refer to psychological variables that can be measured in humans.

Compliance refers to a response—specifically, a submission—made in reaction to a request. The request may be explicit (e.g., foot-in-the-door technique) or implicit (e.g., advertising). The target may or may not recognize that he or she is being urged to act in a particular way. Social psychology is centered on the idea of social influence. Defined as the effect that the words, actions, or ...

People also demonstrate unknown unknown gaps in the possible solutions they can generate to problems. For example, Deanna Caputo and I presented participants with a popular word puzzle called Boggle, in which participants look over a 4 × 4 array of letters and try to find strings of letters that form English words. An example of a Boggle array is given in Fig. 5.1, with the word knife ...

There are several ways of measuring self-esteem. For example, Harrill Self Esteem Inventory is a questionnaire comprising 15 statements about a range of interest. Another example is the Thematic Apperception Test (TAT), which is a neutral cartoon given to the participant who then has to devise a story about what's going on.. Morse and Gergen (1970) showed that in uncertain or anxiety-arousing ...

Along with Michel Foucault's critique of the medical model of mental illness, the work of Scottish psychiatrist R.D. Laing and other influential theorists and critics posed a serious intellectual challenge to the psychiatric establishment. Laing's 1960 *The Divided Self: An Existential Study in Sanity and Madness* theorized schizophrenia as a philosophical problem, not a biological one.
