In statistics, we try to make sense of the world by collecting, organizing, analyzing, and presenting large amounts of data. For example, you may survey your friends about what tv show is most popular, but the small sample size will not give you an accurate idea of what ALL 6th graders like to watch. To do this you must survey a cross section of students from all around the country and all ...

Best Answer: I don't know what TA-1 means. That might be specific to your class/book. Here the trials are independent with a success (right) and failure (wrong) each time. That means that the number of correct answers will have a binomial distribution with number of trials  $n = 10$  and probability of success  $= 0.5$ , since the student has a 50% chance of being right each time.
