with this cookie recipe. It will be a piece of cake!! Purpose: Use a chocolate chip cookie recipe to answer questions related to stoichiometry, percent yield, and limiting reactants. Procedure: Use the following recipe or another favorite chocolate chip cookie recipe and make cookies. If you use another recipe, please add the link or type it in.

Cookie Stoichiometry - molelady.com

In the chemical reaction to produce 72 chocolate cookies, the following reactants are necessary: 8 Tbsp margarine $\frac{3}{4}$ cup cocoa 64 Tbsp sugar 1 cup milk pinch of salt. *Put the above reactants in a pan, bring to a boil on a hot plate, while constantly stirring, and boil for 1 minute (NO LONGER!!).

LAB "Stoichiometry and Chocolate Cookies" - azleisd.net

Transcript of Stoichiometry in cookies. The coefficients in a balanced chemical equation represent moles of reactants and moles of products. The mole ratio (or proportion) of reactants and products in a balanced equation must remain constant. Stoichiometry relates to cookies because all the ingredients added/mixed together make the cookies.
