Well, for several reasons. You probably already do a lot of individual problem solving, and there's a good deal of merit in that. But many of the problems and challenges we face as members of our organizations affect everyone in the group. It makes sense then, that everyone is part of the solution. And, as the saying goes, two heads are better ...

My advice for task 2 introductions is to write them very quickly. Just write 2 sentences: one to introduce the topic, and one to give a basic answer. Let's look at how to do this for a "problem and solution" question: The number of plants and animals is declining. Describe some reasons for this problem and suggest some solutions. Here's my introduction: It is undeniable that wildlife habitats ...

Let's try another one. This time, suppose you work in a lab. You need a 15% acid solution for a certain test, but your supplier only ships a 10% solution and a 30% solution. Rather than pay the hefty surcharge to have the supplier make a 15% solution, you decide to mix 10% solution with 30% solution, to make your own 15% solution. You need 10 liters of the 15% acid solution.

Problem Set 1 Solutions examined by algorithm1 will have dimensions $m \times n = 2 \times c$ or $m \times n = 2 \times 1$. Therefore, the number of columns in the problem strictly decreases with each recursive call as long as $n > 0$. So algorithm1 either returns a location at some point, or eventually examines a subproblem with a non-positive number of columns. The only way for
