The embryology of trilobites is unknown, but after hatching and development of a hard exoskeleton (which presumably occurred at or soon after hatching) they molted their exoskeletons as they grew, as all arthropods today, leaving a record of their developmental stages. Thus, the ontogeny (patterns of growth and development) of trilobites is known only as far as calcite exoskeletons of immature ...

The red fox (*Vulpes vulpes*) is the largest of the true foxes and one of the most widely distributed members of the order Carnivora, being present across the entire Northern Hemisphere from the Arctic Circle to North Africa, North America and Eurasia. It is listed as least concern by the IUCN. Its range has increased alongside human expansion, having been introduced to Australia, where it is ...

Red fox - Wikipedia

The evolution of sexual reproduction describes how sexually reproducing animals, plants, fungi and protists could have evolved from a common ancestor that was a single celled eukaryotic species. There are a few species which have secondarily lost the ability to reproduce sexually, such as Bdelloidea, and some plants and animals that routinely reproduce asexually (by apomixis and ...

1. Introduction. Plastic pollution is ubiquitous in the marine environment, accumulating on the surface of the oceans, throughout the water column and on the seabed (Thompson et al., 2004; Barnes et al., 2009). It has been estimated that 4.8–12.7 million tons of plastic could be entering the marine environment annually (Jambeck et al., 2015), the majority originating from land-based sources ...
