mitosis - Brookings School District

Students will select one chromosome from the sire (blue) and one from the dam (red) for each gene pair. This mimics fertilization, where one trait is inherited from each parent, and will result will be a 'genetic code' for their Reebop. Every student will likely end up with a different genetic code for their Reebop.

MARSHMALLOW MEIOSIS LAB : Reebops

If you look at the Key to Reebop features, you will notice that two Ts (TT) or a T and a t (Tt) code for the same thing: a curly tail. If the Reebop has a small t on each chromosome, he or she will have a straight tail. Because both the heterozygous (Tt) form and one of the homozygous (TT) forms code for the same variation of tail shape,

Activity 2.16 Reebops - nuffieldfoundation.org

Monster Genetics Lab. Heredity is the passing on of traits, or characteristics, from parent to offspring. The units of heredity are called genes. Different versions of the same gene are called alleles. Genes are found on the chromosomes in a cell. The combinations of genes for each trait occur by chance.
