A seedless fruit is a fruit developed to possess no mature seeds. As consumption of seedless fruits is generally easier and more convenient, they are considered commercially valuable. Most commercially produced seedless fruits have been developed from plants whose fruits normally contain numerous relatively large hard seeds distributed throughout the flesh of the fruit.

Seedless fruit - Wikipedia

Annual plants germinate, grow, flower, set seed and die all in one growing season. The first frost usually signals the end of the season for annuals and most need to be replanted each year. Some will set seed if the flowers are left to produce seed heads and return the following year. Keep these ...
