The name "chestnut" is derived from an earlier English term "chesten nut", which descends from the Old French word chastain (Modern French, châtaigne). The French word in turn derives from Latin Castanea (also the scientific name of the tree), which traces to the Ancient Greek word κάστανον (sweet chestnut). A possible source of the Greek word is the ancient town of Kastanea in

Chestnut - Wikipedia

Truth is an elegant perfume built on the contrast between the notes of cool, fresh grass and the warmth of woman's skin. Simple and natural, clean and fresh, just like a brook among the fresh green summer grass. Main notes are bamboo, wet woods, white peony, vanilla, white amber and sandalwood.

This post was triggered by someone reaching here with the search "What is inside peach seeds that's poison". I almost decided to laugh about it like on all other silly search phrases leading here, but then figured I should at least check if maybe it's not silly.. And it turns out that peach seeds

actually contain Cyanide, in the form of Amygdalin.

How poisonous are peach seeds? -- [Ordinary Nothing]

Of main interests to us is the use of mining as a part of in-situ resource utilization, that is: making it easier to industrialize and colonize space by removing the need to pay the sky-high delta-V cost of lugging raw materials up Terra's gravity well.. But in the early stages, asteroid mining start-ups cannot be established to provide minerals to space industrialization because there won't ...
