Key Features. Over the past couple of years Samsung has really raised the game when it comes to display design and the 226BW takes no prisoners in that regards. The glossy black bezel with pleasing curved edges is beautifully offset by a smart silver power switch at the bottom right with a cool blue light present behind it.

**samsung syncmaster 226bw | eBay**

Samsung have a crap product. That's your answer. Here are the details why... It seems the 226BW had a bad EDID. Essentially it's the location on the monitor that the computer uses to check the specs of the monitor. The 226BW is only programmed to 1280x1024 on the EDID chip, so the computer won't allow ANY res higher than that.
